

FTNCT-2021 (List of Accepted and Registered Papers for Presentation)

S.N.	Paper ID	Title
1	14	Classification of Hate Tweets using Hybrid Deep Belief Network Algorithm
2	62	Q-TOMEC: Q-Learning based Task Offloading in Mobile Edge Computing
3	69	Mobility Management in Heterogeneous Network Using Systematic Hierarchy Process and Seagull Optimization Algorithm
4	86	Analysis of Statistical Methods for Vehicle Detection in the Accident Avoidance System An Application of ITS
5	116	RDF Query processing: Relational vs. Graph Approach
6	201	Bi-Modal Meta-Classification of Tweet Spamicity Using Machine Learning Approach
7	215	Auction-based Deadline and Priority enabled Resource Allocation in Fog-IoT Architecture
8	222	Automation in Agriculture: A Systematic Survey of Research Activities in Agriculture Decision Support Systems using Machine Learning
9	257	Cloud Storage Client Forensic: Analysis of MEGA Cloud
10	262	AN ALGORITHM TO DETECT MALICIOUS ACTIVITY IN DYNAMIC VANET ENVIRONMENT
11	34	Coverage, Capacity and Cost Analysis of 4G-LTE and 5G Networks
12	94	Digital Design and Development of Mobile App for Farmers
13	141	Fusion of Federated Learning and 6G in Internet-of-Medical-Things: Architecture, Case-Study, and Emerging directions
14	149	Rail Track Monitoring System using Quantum Key Distribution in IoT Scenario
15	155	Fitness Freaks: A System For Detecting Definite Body Posture Using Open Pose Estimation
16	160	LEAPS: Load and Emission Performance characteristics for Sensor-driven Green Transport Systems
17	202	A Smart Home Automation System Based on Internet of Things (IoT) using Arduino
18	213	BRAIN DEPLETION RECOGNITION THROUGH IOT SENSORS EMPOWERED WITH COMPUTATIONAL INTELLIGENCE
19	223	Advancement & Evolution of LNG Terminals: A Review
20	253	Energy-Efficient Data collection using Compressive Sensing for IoT System

21	273	Dual-hop direct diffusion routing protocol for energy-efficient wireless sensor network
22	279	Design and Development of Smart Waste Bin for Effective Waste Collection and Management
23	21	On the efficacy of deep image denoising for computer vision applications
24	22	Diabetic retinopathy classification using pixel level lesion segmentation
25	23	Auto-colorization of breast mammograms using generative adversarial networks
26	205	Face Recognition and Detection Algorithm-A Review
27	35	A Survey on Vision based elders fall detection using deep learning models
28	36	Pin-Pointing DNA-Binding Protein Mutations using Deep Learning
29	57	Outbreak Prediction of COVID-19 3rd Wave in Asia
30	77	Reconstructing Medical Images Using Generative Adversarial Networks: A Study
31	84	Autonomous Mobile Robot for Inventory Management in Retail Industry
32	105	Quiz Maker: Automatic Quiz Generation from Text using NLP
33	107	Multiclass Image Classification of COVID-19 Chest X-ray Scans Using Deep Learning
34	110	Plant Disease Detection using Image Processing and Machine Learning
35	111	Comparison of BERT-base and GPT-3 for Marathi Text Classification
36	130	Machine Learning based Scene Classification using Thepade's SBTC, LBP and GLCM.
37	137	Analytical study of Content Based and Collaborative Filtering Methods for Recommender Systems
38	143	Emotion Detection using Facial Expressions
39	148	A Review on Deep fakes detection using Machine learning techniques
40	190	DEEP LEARNING BASED OBJECT DETECTION: AN INVESTIGATION
41	32	Survey: Emotion Recognition from Text Using Different Approaches
42	214	DICTIONARY BASED GENDER IDENTIFICATION AND GENDER BASED SENTIMENT ANALYSIS WITH POLARIZED WORD2VEC
43	219	Exploratory Data Analytics of Total Population over fertility rate in South Korea

44	232	Prediction & Analysis of Cardiovascular Disease using Multivariate Logistics Regression Classification
45	234	A Survey on Multilevel Thresholding based Image Segmentation Techniques
46	235	A novel Convolutional Neural Network based segmentation model for lung CT-Scan images affected by COVID 19.
47	241	Predicting Personalities Through Online Posts Using NLP
48	243	Multi-Document Abstractive Summarization for PPT Generation
49	256	Personality Recognition for Candidate Screening
50	269	Face Identification through Facial Skeletal Features
51	129	Object-detection based Recommendation Engine for Advertising using Deep Learning
52	238	A Novel Approach To Recognize Optical Characters Of Number Plate Using Object Detection
53	11	"Randomly Hiding Secret Data Using I-Blocks and E-Blocks for Image Steganography"
54	15	Blockchain Security: A Systematic Review
55	20	Adoption of Blockchain Technology to secure Electronic Healthcare Record for efficient Healthcare System
56	27	Password protected lossless visible watermarking technique for digital Image
57	28	Secure Data sharing in Medical Cyber-Physical System- a Review
58	99	Secured Fog-Based System for Smart Healthcare Application
59	102	Blockchain based secure data transmission for UAV Swarm using Modified Particle Swarm Optimization Path Planning Algorithm
60	139	Internet of Behavior (IOB) in Cyber Security.
61	151	Differential Privacy Mechanisms: A State of the Art Survey
62	185	Phishing Site Detection Using Artificial Intelligence
63	212	A Survey on Ciphertext Processing Techniques
64	224	Deep analysis of attacks and vulnerabilities of web security
65	254	DIMDA: Deep learning and Image-based Malware Detection for Android
66	278	Face Recognition using VGG16 CNN Architecture for Enhanced Security Surveillance – A Survey

67	40	Profiling Cyber Crimes from news portals using web scraping
68	51	Privacy Preserving Outsourced k Nearest Neighbours Classification: Comprehensive study
69	158	Evaluating tip selection Algorithms for IOTA Blockchain
70	75	Protecting Alexa from Remote Voice Command and Inaudible Voice Command Attacks
71	211	Cybersecurity for Dummies
72	138	Workload aware Cost-based Partial loading of Raw data for Limited Storage Resources
73	150	A Stable Payoff Allocation Protocol for Controlling the Selfishness and Managing the Power Consumption in Mobile Ad Hoc Networks
74	183	Game of Definitions- Do the NIST definitions of Cloud Service Models need an update? A remark
75	277	Machine Learning based model for Effective Resource Provisioning in Cloud
76	248	An Energy Efficient Routing for Emergency Rescue in IoT based WSN
77	280	Big Data Analytics in e-healthcare using Hadoop and Hive
78	239	Research of Basic Characteristics of Wireless Sensor Networks for Energy Monitoring System
79	24	Localization of Sensor Node by novel Quantum Walk-Pathfinding Rider Optimization(QWPRO) by Mobile Anchor Node
80	186	Prediction of Trait Anxiety in Humans
